PROFILE & MOTIVATION

4th-year B.Sc. Software Engineering student at Daffodil International University, Bangladesh, with hands-on experience in machine learning, computer vision and Linux-based systems, and international academic exposure through the IIT Bombay Summer School 2026 (Group Testing for Data Science) and the World Friends Korea (WFK) IT Volunteer Program 2025. I have also completed a short course in basic Russian, and I am seeking to join the Winter University in Engineering Sciences 2026 to learn from Russian engineering faculty, collaborate with students from other countries, and bring back ideas to apply in my university's technical community. Ready for an intensive, fully in-person academic programme (23 Nov – 6 Dec 2026).

EDUCATION

B.Sc. in Software Engineering | Daffodil International University, Dhaka, Bangladesh 2023 – Present

- Current year of study: 4th year | CGPA: 3.48 / 4.00 | Expected graduation: July 2027
- Relevant coursework: Data Structures & Algorithms, System Design, Database Management, Machine Learning, Operating Systems / Linux

Higher Secondary Certificate (HSC) | Mymensingh Board 2020 – 2021

Secondary School Certificate (SSC) | Dhaka Board 2019 – 2020

TECHNICAL PROJECTS

Rooftop Detection System | Computer Vision & Machine Learning

- Built an automated pipeline to detect rooftops from aerial and satellite imagery using image processing and machine learning.
 - Implemented data preprocessing, model training and performance evaluation to ensure reliability.
- Applied the extracted rooftop features to solar-panel installation planning and urban development analysis

ShopListing | PHP & MySQL Web Application

- Developed a dynamic shop listing platform using PHP, MySQL, HTML, CSS and JavaScript, with admin authentication, shop and product CRUD operations, image uploads, and a responsive public shop directory.
- Designed a structured backend with database integration, reusable PHP components, input validation and Apache configuration for efficient shop and product management.

Dargibari | Linux-Based Tailor Shop Management System (Bash)

- Designed a terminal-based management system with SHA-256 secure authentication, measurement input, automated billing and invoice generation.
- Handled CSV-based data management using Linux utilities (awk, grep, bc, sha256sum), demonstrating systems design and automation skills.

INTERNATIONAL & ACADEMIC EXPERIENCE

Short Course on the Russian Language | Daffodil International University Completed

- Completed a short course on the Russian language and basic communication skills [Oct,06,2025].
- Learned foundational Russian vocabulary, pronunciation and everyday expressions, in preparation for studying and living in a Russian-speaking environment.

Summer School Participant | IIT Bombay, India July 6 – 11, 2026

- Completed the summer school "Group Testing: An Important Tool for Data Science", taught by Prof. Ajit Rajwade (IIT Bombay). [In person]
- Studied how group-testing principles are applied to data science problems, alongside students from other institutions

International IT Volunteer | World Friends Korea (WFK) & National Information Society Agency (NISA), Korea July 12 – 31, 2025

- Selected to represent Daffodil International University in a bilateral ICT training and exchange programme.

- Worked with Korean volunteers and international peers on ICT capacity-building and knowledge-sharing sessions in a three-week intensive in-person setting.
- Gained practical experience in cross-cultural teamwork, directly relevant to a multinational programme such as the Winter University.

Member / IEEE

2025 – Present

- Engage with technical workshops and the wider international engineering community.

LEADERSHIP & CAMPUS INVOLVEMENT

HR Secretary / Data Science Club, DIU

Nov 2025 – Present

- Run recruitment, applicant screening, interviews and onboarding for a club of [450+ / 50+ : confirm] members; maintain records and coordinate between the executive board and members.

Executive Member / Software Engineering Club, DIU

Jan 2024 – Dec 2025

- Coordinated 1 technical workshops, seminars and events on emerging technologies, data science and software development practices.

Rover / DIU Air Rover Scout Group

Jan 2024 – Present

- Developed teamwork, discipline and adaptability through expeditions, group coordination and community service projects.

TECHNICAL SKILLS

Programming: C, Python, Java, PHP

Machine Learning & Vision: Image processing, model training and evaluation [list libraries, e.g., OpenCV, TensorFlow/PyTorch]

Web & Databases: HTML, CSS, JavaScript (fundamentals), PHP, Express.js, MySQL, MongoDB, Apache

Systems & Tools: Linux/Bash, Git

Core CS: Data Structures & Algorithms, Problem Solving, System Design

LANGUAGES & SOFT SKILLS

Languages: Bangla (native); English ; Russian (basic, short course completed at DIU)

Soft skills: Cross-cultural communication, teamwork, project coordination, event planning, public speaking, time management
